

Below are cmdlets and parameters associated with the settings shown in the video. Remember, you can find more information about these commands on Microsoft's website:

<https://learn.microsoft.com/en-us/powershell/module/teams/?view=teams-ps>

These options are in the *Microsoft Teams Admin Center > Meetings > Meeting Policies > Content Protection* section.

Note: When using \$true or \$false in PowerShell, you can think of \$true as meaning "on" and \$false as meaning "off."

Watermark videos

```
Set-CsTeamsMeetingPolicy -Identity "MyCustomPolicy"  
-AllowWatermarkForCameraVideo $false
```

Watermark shared content

```
Set-CsTeamsMeetingPolicy -Identity "MyCustomPolicy"  
-AllowWatermarkForScreenSharing $true
```
