In our Course we are going to do as follow:

- **350-401 ENCOR Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR)**
- **300-410 ENARSI Implementing Cisco Enterprise Advanced Routing and Services (ENARSI)**

Implementing Cisco Enterprise Network Core Technologies v1.0 (350-401)

Exam Description: Implementing Cisco Enterprise Network Core Technologies v1.0 (ENCOR 350-401) is a 120-minute exam associated with the CCNP and CCIE Enterprise Certifications. This exam tests a candidate's knowledge of implementing core enterprise network technologies including dual stack (IPv4 and IPv6) architecture, virtualization, infrastructure, network assurance, security and automation. The course, Implementing Cisco Enterprise Network Core Technologies, helps candidates to prepare for this exam.

The following topics are general guidelines for the content likely to be included on the exam. However, other related topics may also appear on any specific delivery of the exam. To better reflect the contents of the exam and for clarity purposes, the guidelines below may change at any time without notice.
