

# Perform Vulnerability Research in National Vulnerability Database (NVD)

***ILABS***

***CEH PRACTICAL***

@mmar

## Aim

The National Vulnerability Database (NVD) is the U.S. government repository of standards-based vulnerability management data represented using the Security Content Automation Protocol (SCAP). This data enables the automation of vulnerability management, security measurement, and compliance. The NVD includes databases of security checklist references, security-related software flaws, misconfigurations, product names, and impact metrics

**Here, we will use the NVD to view the latest underlying system and software vulnerabilities**
