

What are symbols in binary ?

- Symbols are names of functions and variables which are stored inside the binary file.
- It is used for debugging purpose.

Symbol example

Symbols are name of functions and variables

```
#include<stdio.h>
extern int number1 = 10;
extern char *name = "Udemy";
```

```
Void fun1()
{
}
Void fun2()
{
}
```

```
Int main()
{
puts("Hello World");
fun1();
fun2();
```

```
return 0;
}
```
