About

Exe2Aut is designed to be the easiest to use and most versatile decompiler for compiled AutoIt3 scripts one could think of. Simply drag and drop the executable onto Exe2Aut's main window and the source script will be displayed. Unlike the decompiler that's being shipped with AutoIt3, Exe2Aut is even capable of decompiling executables that have been packed and protected using AutoIt3Camo, Themida, Armadillo, Safengine and so forth due to its low level nature.

Disclaimer

Unless required by applicable law or agreed to in writing, all software found on this website is distributed on an "as is" basis, without warranties or conditions of any kind, either express or implied. Distribution (other than linking to this website) and commercial use strictly prohibited.

Known Issues

- Exe2Aut might cause malicious scripts to get executed. Although this is unlikely to happen, we strongly advise you to always run Exe2Aut within a **virtual environment**.
- Deobfuscation was scrapped in favor of stability.
- x64 executables are currently not supported.

Download

Executable	Exe2Aut.exe
Size	50.18 KB
